

# AFRIKA KOMMT! 2022-2024

An Initiative of German Industry for Future Leaders from Africa

## Candidate Profile: Process Performance Analyst

<b>Company:</b>	<b>Boehringer Ingelheim</b>	
<b>Education:</b>	Our ideal candidate holds a degree in natural science, e.g. pharmacy, medicine, engineering, biology or others.	
<b>Professional Experience:</b>	<p>We are looking for someone who brings expertise in the development and/or routine manufacturing of pharmaceutical and/or medicinal products and has ideally already gained some hands on experience in different areas like process development, scale-up, quality and regulatory affairs.</p> <p>On top of your scientific background additional professional experience in an IT heavy environment e.g. as IT project lead, consultant or a similar role would be relevant for completing your profile.</p>	
<b>Additional Qualifications:</b>	<ul style="list-style-type: none"> <li>- Project management training and / or experience, ideally including agile approaches</li> <li>- Used to work with project plans, metrics and project controls</li> <li>- Knowledge of process analysis and improvement methodologies like Six-Sigma, Lean or Value Stream Mapping would be an asset.</li> <li>- Solid written and verbal communication skills in English</li> </ul>	
<b>Division / Department, Place:</b>	<p>Human Pharma Supply Launch and Innovation / Launch and Lifecycle Center Solids</p> <p>The Human Pharma Supply Launch and Innovation is part of the global Human Pharma Business Unit. Our tasks include site selection, transfer, industrialization, fast launch execution, commercial production, introduction of innovative technologies for our network factories and lifecycle management to ensure continuous supply and optimal access to medicines for patients.</p>	
<b>Assignment / Area of Activity:</b>	<p>During your assignment you will interact with different teams in the Launch and Innovation unit and analyse processes along the value chain. The primary goal will be to identify relevant factors impacting key deliverables and to develop a risk based monitoring system which supports the early identification of potential threats to their completion in time, scope and budget.</p> <p>Your home base will be our project management office and you will work together with the team to include your results into their capabilities to plan ahead, identify critical tasks and processes and to highlight opportunities and threads.</p>	
<b>Remarks:</b>		
<b>Preferred Nationality:</b>	All nationalities are welcome.
